Fresh Graduate Computer Science Major

Jambi City, Jambi, Indonesia

Skills

Technical Skills:

Javascript, Express, hapi, jQuery, PHP, Laravel, ReactJS, Cloud Computing, MySQL, PostgreSQL, MongoDB, REST API, Git, Java, OOP, Spring, Python, GO, Microsoft Office.

Languages:

Fluent in Indonesia, Professional Working Proficiency in English.

Experience

Altrusights

Web Developer Intern

Feb 2025 – May 2025

- Developed and contributed to two web applications utilizing Laravel, jQuery, and MySQL.
- Engineered core features for a warehouse management system, encompassing stock transfer and receiving functionalities, purchase order (PO) generation, and the creation of delivery orders and receipt notes.
- Supported backend development using Laravel and enhanced frontend interactivity with jQuery and JavaScript, including API integration and MySQL database operations.

Bangkit Academy

Cloud Computing Learning Path

Aug 2023 – Jan 2024

- Led the Backend side of our Capstone Application Project, Connecting the Frontend side of our Application with a **RESTful API** that are build using **Express, Prisma, JWT, Cloud SQL**, and deploying it to **Google Cloud Run**.
- Gain a deeper understanding on how Cloud Computing works, and learning more about Google Cloud technologies like **Cloud Run, Cloud SQL, App Engine** and **Compute Engine** for deploying an API or Web Apps.
- Learn an important Soft Skills that i can apply in a real world like, **Time Management, Critical Thinking and Problem Solving**, and **Project Management**.

Sriwijaya University Advanced Programming Laboratory

Lab Assistant

Oct 2023 – Dec 2023

- Managing a Computer Laboratory that are often used as a Class, and sometimes i'm also Supervised the lessons that were conducted in the laboratory.
- Held a **Network Automation training using Python GNS3**, that were open to public.

Education

Sriwijaya University

Faculty of Computer Science

Informatics Engineering - 3.95

Palembang, Indonesia

2021 – 2025

Projects

FoodParadise

Apr 2024 – Jun 2024

- A Robust Restaurant Food Ordering website that i build using **Laravel**, a one-stop shop to order food online, featuring **real-time chat, secure PayPal payments**, reservations, appetizing coupons, and a delectable newsletter to keep you informed.

Clothize App

Nov 2023 – Dec 2023

- A Local Tailoring and Automatic Clothes size measuring platform, where i build a **RESTful API** for the Back-end side of the application using **Express**, and setting up the application database with **Cloud SQL**, and also deploying the API to **Google Cloud Run**.

SRIFOTON 2023

Jun 2023 – Oct 2023

- A Website for SRIFOTON 2023 where we held a National Seminar and National Tech Competition like Competitive Programming, Web Development and UI/UX Design, i build a **RESTful API** with other team member for the Back-end side of the application using **Laravel**.

Activities

Himpunan Mahasiswa Teknik Informatika - Universitas Sriwijaya

Academic Division Team

Feb 2023 – Dec 2023

- Mentor for basic programming skill for Sriwijaya University Freshmen
- Making some controllers and models in the Back-End for SRIFOTON 2023 Website
- Making Competitive Programming problems for SRIFOTON 2023 Competition.
